Full Stack & DevOps Engineer with production experience architecting, building, and deploying cross-platform web and mobile applications using React Native, Next.js, Node.js, and AWS. Proven record of managing end-to-end CI/CD pipelines, high-throughput cloud infrastructure, and multi-tenant platforms.

WORK EXPERIENCE

Pixact Technologies, *Full Stack & DevOps Engineer (USA, Remote)* **03/2026 - Present**

- Developed and shipped cross-platform mobile applications using **React Native, Expo, TypeScript, and JavaScript**, implementing production features, API integrations, authentication, and device-specific functionality.
- Built supporting backend services and **10+ scalable REST APIs**, integrating mobile applications with high-throughput PostgreSQL databases.
- Managed application builds, release workflows, **CI/CD and cloud deployments**, contributing across the full product lifecycle.
- Troubleshoot production issues and optimize application **performance, reliability, and user experience** across mobile and web platforms.

Evolisyss, *Full Stack & DevOps Engineer (USA/Canada, Remote)* **01/2025 - 03/2026**

- **Developed and maintained production web applications** across e-commerce, booking, marketplace, and service domains using **Next.js, React, Node.js, REST APIs, PostgreSQL, and cloud deployment workflows**.
- Architected secure authentication pipelines and automated cloud deployment workflows across **5 distinct client products**, ensuring scalable and isolated production environments.

EYAI Ventures, *MERN Stack Developer (Karachi, Pakistan)* **07/2024 - 10/2024**

- Engineered responsive e-commerce interfaces for ADMARC, integrating an AI-driven chatbot to automate customer support workflows and increase user engagement.
- Optimized production environments by resolving critical UI/UX bottlenecks, significantly improving application load times and overall system usability.

TECHNICAL PROJECTS & PRODUCTION BUILDS

Lead Engineer & DevOps | *Fuel Wave* *(Web, IOS, Android)*
Live · Next.js · React Native · ExpressJS · Expo · Web · IOS · Android

- **Increased Fuel Wave revenue by 30%** by taking the business online and delivering its production mobile and web platforms.
- Led development alongside **1 teammate**, delivering the majority of the product across mobile, web, and backend integrations.
- Served as **sole DevOps owner**, managing infrastructure, CI/CD, deployments, releases, and production troubleshooting; launched across **3 platforms**.

Full Stack & DevOps Engineer | *SkillLink Global* *(Staging / Pre-Launch Website)*
Pre-Launch · Next.js · React Native · NestJS · PostgreSQL · AWS

- Architected a multi-sided marketplace architecture supporting **7 distinct user flows** and **multi-role account authentication**: vendors, service providers, employers, job-seekers, trainers, trainees, and customers.
- Built web and mobile applications supporting **multi-role accounts, real-time chat and voice communication using websockets and S3, reviews, ratings, and marketplace workflows**.
- Independently designed the **AWS deployment architecture and GitHub Actions CI/CD**, using **ECS Fargate, ALB, RDS, S3, ECR, CloudWatch, IAM, Security Groups, and VPC**, maintaining 3 isolated environments.

Lead Product Engineer | *Averx Global* *(Web)(Portal)*
Saudi Arabia · Live

- Develop and drive product strategy for a logistics platform covering pallet shipments, courier services, and warehouse storage.
- Own **end-to-end technical implementation**, translating operational requirements into product features and software solutions.
- Bridge **business and engineering decisions** as both an executive and developer, contributing to product direction, architecture, and ongoing platform development.
- Design advanced backend routing logic, including automated vendor rate-matching engines and real-time SLA filtering rules for parcel and pallet transport services.

Full Stack Developer | *Virtual Arena* *(Web)*
Canada · Live

- Developed features for a virtual arena platform supporting **venue bookings, events, and e-commerce**.
- Managed third-party integrations and core application functionality, ensuring high availability and seamless execution for live transaction processing.
- Accelerated venue booking and checkout workflows by optimizing database queries, reducing average API response latency by 35% and significantly improving the end-user experience.

Full Stack & Payment Engineer | *UVARD* *(Web)(Android)*
LMS Platform · Web + Android · Production

- **Solely developed an end-to-end LMS platform and mobile app**, implementing student, instructor, and referral dashboards with course purchasing, video learning, assignments, grading, and certification workflows.
- Engineered complex financial workflows, integrating Stripe Connect with automated split payments to seamlessly manage multi-party instructor payouts and platform fees.
- Implemented **course commerce, video playback, assignment evaluation, referral/marketing workflows, and role-based dashboards** across web and mobile.
- Built automated **certificate issuance with verifiable codes**, enabling credential validation.

TECHNICAL SKILLS

Frontend/Mobile: React, Next.js, React Native, Expo, TypeScript, JavaScript, Tailwind CSS, Three.js
Backend: Node.js, NestJS, Express.js, TypeScript, JavaScript, REST APIs, WebSockets, Prisma
Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Supabase, NeonDB
Cloud/DevOps: AWS, ECS Fargate, EC2, RDS, ALB, CloudWatch, IAM, Security Groups, S3, Docker, Nginx, GitHub Actions, CI/CD, Vercel, Netlify
Tools: Git, GitHub, Clerk, Sanity CMS, Figma, Stitch, Postman

EDUCATION

- **Bahria University,** Bahria school of Engineering & Applied Sciences, Karachi, Sindh
  Bachelors in Computer Science
- **Meritorious College for A Levels, British Council,** Karachi, Sindh
  Grade ‘A’ in Computer Science
